The winemaking process is as much intellectual as it is sensory, and the Novelty Hill-Januik Winery takes pains to reflect that duality. The cerebral design takes into account the rhythm and geometry of the agricultural landscape, along with the craft, technology, and patterns of wine production (the enterprise makes a wide range of vintages under both the Novelty Hill and Januik labels). Still, the sensual pleasures are well addressed by the cozy outdoor fire pit, the well-landscaped terraces that encircle a bocce court, and the incorporation of the surrounding wetlands into the public spaces.
